Ruth Eifler and Inga Hoffman have just left Maluti Adventist Hospital. They came to us with plenty of energy and desire to help us in many ways: assisting patients, conducting wound care seminar training , assisting us at OT and many other things.

So little could be done without your strong support and lovely contribution for this Missionary trip. This letter indeed, is an expression of gratitude toward you for your willingness to join forces and build up a project which was a great blessing for our hospital and many patients as well.

Your dream has been accomplished in the sense that many patients were left smiling without pain, wounds healed, and people walking once again are some of those results thanks to your initiative.

It is difficult for me to be expressive enough and paint you the whole picture but this is a reality not possible to hide.

From the button of our heart:

May God Bless

Dr Jorge Rodriguez
